

SSRN Proceedings Hosting

Addie Jackson – Scholarly Communications Manager at SSRN
addie@ssrn.com

Proceedings Hosting process

Step 1: SSRN sets up dedicated submission portal for each proceedings

Step 2: Organizer or authors upload papers. SSRN processes submissions

Step 3: Papers are displayed on a permanent, logo-branded page on SSRN with a label indicating they are part of conference proceedings

Step 4: SSRN announces proceedings and invites subscriptions to proceedings eJournal

Step 5: SSRN distributes proceedings eJournal issues

SIDM 2019 Tracks:

- Track 1: Infrastructure Asset Management & Structural Impact Analysis
- Track 2: Wastewater Recycling and Reuse & Solid Waste Management
- Track 3: Sustainable Environmental Planning and Design & Urban Infrastructure Management
- Track 4: Project Management Delivery & Performance
- Track 5: Sustainable Construction - Techniques & Technology
- Track 6: Pollution Prevention & Control
- Track 7: Green Construction Materials
- Track 8: Intelligent Transport System

SSRN

In cooperation with VIT-Vellore National Institute of Technology, the Engineering Research Network (ENR) is pleased to announce the Sustainable Infrastructure Development & Management (SIDM) 2019 eJournal. This eJournal is available to all subscribers. The eJournal is free of charge and contains abstracts of the meeting papers with links to the full text in the SSRN eLibrary.

SUSTAINABLE INFRASTRUCTURE DEVELOPMENT & MANAGEMENT (SIDM) 2019

Treatment Efficiency Enhancement of Dairy Effluent by Biodegradation Using Bacterial Species 1
Proceedings of Sustainable Infrastructure Development & Management (SIDM) 2019

VISHWANATH GUBBANA, Government College of Engineering (GCE), Anantnag, Students
Email: vgubbana@gmail.com
B. D. SHARMA, Government College of Engineering (GCE), Anantnag, Students
Email: bdsharma19@gmail.com

Dairy wastewater mainly contains biodegradable pollutants and generally treated by using biological processes. Bacterial species plays vital role in reducing pollutants and organic waste concentration from dairy effluent to permissible limit. Activated sludge process is most commonly used for biological treatment but it has few treatment problems that cause down to its efficiency, which can be increased by bioaugmentation of specific bacterial species and growing them by providing favorable environmental conditions from the dairy effluent. Studies are carried out in search of bacterial species which can effectively remove particular pollutant from wastewater. Lot of researches emphasize the importance of various bacterial species in treatment of wastewater emerging from different sources of industries. Efficiency of conventional activated sludge process can be increased by adding specific kind of bacterial species. The present study was carried out to evaluate efficiency of biodegradation bacteria like bacillus subtilis and penicillium aeruginosum for the treatment of dairy wastewater. A jar test model of modified sludge, with the provision of effluent recirculation was developed. Study was carried out to test the performance of reactor tank under both pure culture & mixed bacterial species. Removal of biochemical oxygen demand (BOD₅) and COD. Treatment efficiency in terms of COD removal for individual species of bacteria was studied for the period of 14 days. The *Penicillium aeruginosum* offered highest COD removal efficiency for dairy wastewater, which was 84.2%.

Sustainability Metrics for Ground Improvement Techniques 1
Proceedings of Sustainable Infrastructure Development & Management (SIDM) 2019

The world is facing serious issues such as global warming, air pollution, water disposal, ozone layer depletion and many more because of unsustainable engineering practices being carried out today and the factors affecting these practices such as time, money and performance requirements. Sustainable engineering projects being more resource intensive of all the civil engineering projects and due to their early occurrence in construction stage, can be made

Why choose SSRN? (vs. journal publication)

- **Few formatting/content type restrictions** – Proceedings content on SSRN may contain abstracts, full-text articles, posters, presentation slides, etc. (as a PDF file). There is no required paper template/style, no minimum/maximum number of pages and no requirements regarding % of international participation.
- **Original copyright holder retains rights** – You only grant SSRN non-exclusive rights to post and distribute the papers.
- **Flexible timeline** – Submit and publicly release proceedings on your timeline – before, during or after the conference. Proceedings can be live/available online within one week after all submissions have been received by SSRN.
- **Submissions remain editable** – Authors may access their own papers at any time to make updates as needed which helps ensure the most recent and compliant version of a paper is available in the proceedings.
- **Personal review & interdisciplinary classification** – Every submission to SSRN is individually reviewed for completeness by a member of our staff. Each paper goes through additional review by our subject matter experts to determine which of our topical email alerts it should be distributed in.

Please Note: SSRN does not perform “peer review”.

Additional benefits

- **Free, open access (OA)**
 - Papers are freely and immediately available online
 - No subscription or account is required to access the content
- **Increased discoverability**
 - Indexed by Google Scholar, Google and other public search engines
 - Global audience of relevant researchers targeted via SSRN communications
- **Extended “life” of proceedings**
 - Papers remain permanently available on SSRN unless removed by conference organizer or authors
 - Papers will be added to additional SSRN distributions where appropriate (e.g. Research Paper Series)

Pricing & features

Standard Pricing

1-20 submissions	\$2500 USD
21-50 submissions	\$3500 USD
51-150 submissions	\$5250 USD
151-550 submissions	\$7375 USD
551-1000 submissions	\$9450 USD
1000+ submissions	Custom

Add-on Features

- Additional network: \$500 per network, can discount if more than two additional (total of three since one network is included in the base price)
- Archive uploads (uploading proceedings from before the previous year): use standard pricing but cost based on total number of papers, not papers per year
- Other customization may be available upon request (e.g. branded customer hub, embedding images in abstract)

Sample SSRN conferences

Academic Research Colloquium for Financial Planning & Related Disciplines

Organized by the CFP Board (<https://www.cfp.net/>)

2019 proceedings: <https://www.ssrn.com/link/ARC-2019.html>

We have worked with this customer since 2018.

This customer also ended up creating their own “sponsored network” on SSRN after starting as a Conference customer! <https://www.ssrn.com/index.cfm/en/finplanrn/>

Paris December Finance Meeting

Organized by Institut europlace de finance (<https://www.institutlouisbachelier.org/en/institut-europlace-de-finance/>) along with other sponsors (usually Eurofidai and ESSEC Business School, sometimes a third sponsor as well)

2019 proceedings: <https://www.ssrn.com/link/Paris-2019-EUROFIDAI-ESSEC.html>

This is a “big name” conference in the Finance field. We have worked with this customer since 2007.

Sample SSRN conferences

Annual Conference on Financial Market Regulation

Organized jointly by the US Securities & Exchange Commission (SEC) and Lehigh University

2019 proceedings: <https://www.ssrn.com/link/6th-Financial-Market-Regulation-CONF.html>

We have worked with this conference 2017-2019. They were not able to return in 2020 due to COVID-19 challenges but it seems likely they will return for future conferences.

Greenhouse Gas Control Technologies Conference

Organized by International Energy Agency Greenhouse Gas R&D Programme (IEAGHG) (<https://ieaghg.org/>)

2018 proceedings: <https://www.ssrn.com/link/14th-Greenhouse-Gas-Control-Technologies.html>

This is a “big name” conference in the Energy industry/field. We have worked with this customer since 2018. The conference takes place every other year.

Sample SSRN conferences

Australasian Finance & Banking Conference

Organized by the Institute of Global Finance at UNSW Business School, UNSW Sydney

2018 proceedings: <https://www.ssrn.com/link/31st-Australasian-2018.html>

We have worked with this customer since 2007. They had some internal issues with their 2019 conference so it's not clear whether they will put those proceedings on SSRN but I expect they will return for 2020 unless they have to cancel their conference due to COVID.

Miami Behavioral Finance Conference

Organized by Miami Business School, University of Miami

2018 proceedings: <https://www.ssrn.com/link/9th-Miami-Behavioral-Finance-Conf.html>

We have worked with this customer since 2015.

Their authors/participant base frequently use SSRN outside the conference so we just pull in their existing SSRN submissions to create the proceedings each year.
